## Technical Guide for POS2PMS Configuration:

This application communicates between POS and PMS when POS Server and PMS server are different. The main task of this application is to copy PMS server's "Check-In" data to POS and same way post POS server's room posting to PMS server.

You can download the application by going to -

<http://www.ezeefrontdesk.com/download/Integration/POS2PMS.zip>

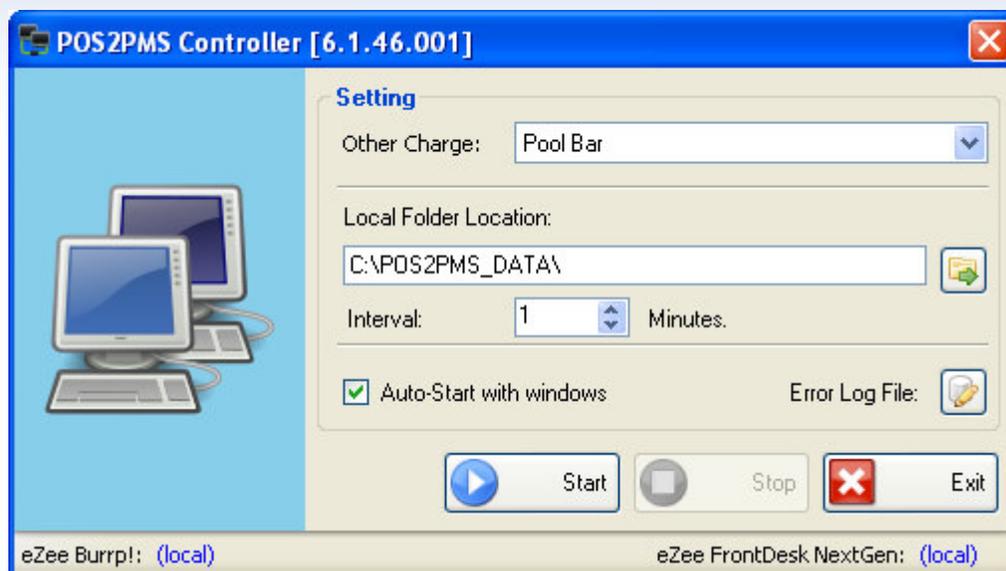

Below is the schematic view of what happens when you use this application.

### *Extraction and configuration of POS2PMS:*

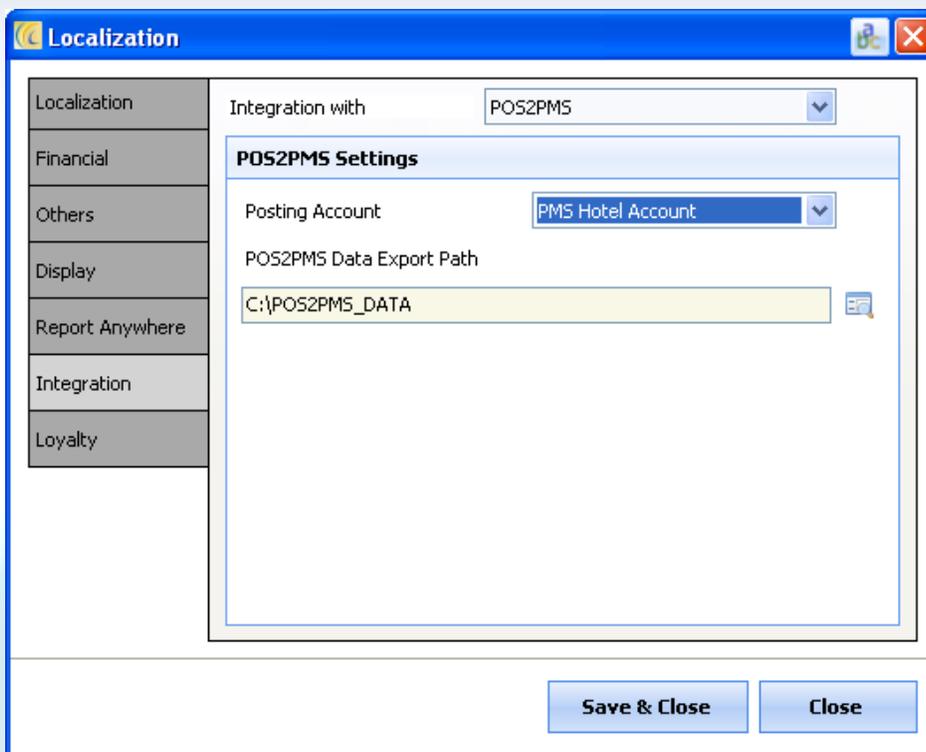

Extract POS2PMS.zip file to POS Server Application Path

- 1) There is one file named "POS2PMS.exe" in this zip.
- 2) Run the POS2PMS Application and configure it as explained below.

### *Field you see while configuring POS2PMS:*

- ❖ **Other Charge:** Select the other/extra charge you have created (in eZee FD) for posting the POS amount to PMS folio.
- ❖ **Local Folder Location:** POS Server folder which handles posting files in it.
- ❖ **Interval:** Interval Time of posting POS file to PMS.
- ❖ **Error Log File:** This will pull up the error logs if POS2PMS is not working properly.
  
- ❖ After configuring the POS2PMS application, we will have to set the integration settings from eZee POS back office:
  - ❖ Open POS BackOffice.
  - ❖ Click eZee Icon (top left corner of the screen)>> Option
  - ❖ Click Integration tab. You will see the window as pasted below.

*Fields you find in the above screen shot:*

- ❖ **Integration with:** select POS2PMS from the drop down box.
- ❖ **Posting Account:** You will have to create a City Ledger Account which will hold amount postings of Receipts and select the same here.
- ❖ **POS2PMS Data Export Path:** POS Server folder which handles Posting files in it.

**Note:** This Application communicates with 2 different servers. So, always run this application on POS server, and configure PMS as client machine on POS Server.
